SUMMARY

Android engineer with 5+ years building and scaling production apps, most recently national-scale FinTech serving millions of daily users at JazzCash. I design shared Kotlin codebases with *Kotlin Multiplatform* and *Compose Multiplatform*, backed by Ktor, Coroutines/Flow, clean modular architecture and automated testing (JUnit, MockK, Espresso) in CI/CD pipelines. Shipped secure payment rails (Veem, C2C Bulk Payments, BNPL), real-time location systems and AI-powered media apps — with a >99.8% crash-free rate and 4.6-star rating across 500K+ downloads.

EXPERIENCE

Senior Android Engineer

06/2025 – 08/2026

AKSA-SDS (JazzCash) · Islamabad · FinTech & digital banking

Led architecture and feature delivery for JazzCash and JazzCash Business — national-scale consumer and merchant apps used by millions every day.

- ♦ Architected and shipped end-to-end payment rails — **Veem** global payments, **C2C Bulk Payments** and **Yeylo BNPL** — with encrypted transport and strict transactional integrity.
- ♦ Built real-time merchant dashboards for revenue trends, settlement history and daily sales.
- ♦ Modularised the codebase around MVVM + Clean Architecture with Dagger-Hilt and Coroutines/Flow — cutting coupling, removing memory leaks and improving responsiveness.
- ♦ Engineered the localisation layer enabling instant in-app language switching for a nationwide audience.
- ♦ Raised the engineering bar through code reviews and testing benchmarks; partnered with Product and Design to land every sprint on time.

Android Developer

03/2023 – 03/2025

Funprime Technology · Islamabad · Mobile products & AI

- ♦ Designed, built and shipped **5+ production apps** from scratch in Kotlin, Jetpack Compose, Coroutines and REST.
- ♦ Built **Family Locator** and **AI Sticker Generator** as both native Android and **Kotlin Multiplatform** apps, sharing business logic, networking (Ktor Client) and data layers across Android and iOS with Compose Multiplatform UI.
- ♦ Delivered low-latency real-time location sharing on Google Maps, WebSockets and **Ktor** backends.
- ♦ Built AI media apps, using Accessibility Services for live on-screen text capture and translation.
- ♦ Held a **>99.8% crash-free** session rate and smooth 60 FPS rendering by profiling with Android Profiler and LeakCanary.
- ♦ Wired Firebase FCM, Crashlytics and Remote Config for high-volume push, remote A/B tests and analytics.

Android Developer

08/2022 – 03/2023

Solution of Technologies · Rawalpindi · Consumer apps

- ♦ Built native Input Method Editors with real-time speech-to-text and low input latency.
- ♦ Implemented algorithmic prayer-time calculation and fully offline content via Room and SQLite caching.
- ♦ Lifted Play Store ratings to **4.6-star rating across 500K+ downloads** through Material Design and accessibility improvements.
- ♦ Hardened API layers with Retrofit, structured error handling and exponential-backoff retries.

Techinn Technologies · Rawalpindi

- ♦ Engineered on-device image transformation (“Gender Swap”) with low-level Bitmap and Canvas processing – no third-party APIs.
- ♦ Built a strong foundation in component lifecycles, background threading and object-oriented design in Java and Kotlin, working alongside senior engineers in Git.

TECHNICAL SKILLS

Multiplatform: Kotlin Multiplatform (KMP), Compose Multiplatform (CMP), Ktor Client, Koin

Languages: Kotlin (advanced), Java, SQL, JSON

Android UI: Jetpack Compose, Material Design 3, XML layouts, custom views, Navigation, accessibility

Architecture: Clean Architecture, MVVM, MVI, SOLID, multi-module, repository pattern

Concurrency: Coroutines, StateFlow / SharedFlow, LiveData, WorkManager, foreground services, lifecycle

DI & networking: Dagger-Hilt, Koin · Retrofit, OkHttp, Ktor (client & server), REST, WebSockets

Data: Room, SQLite, DataStore, SharedPreferences

Testing: Unit testing, JUnit, MockK, Espresso, Compose UI Testing, Turbine, integration testing

Tooling: Firebase (FCM, Crashlytics, Analytics, Remote Config), Git/GitHub, CI/CD (GitHub Actions), Android Profiler, LeakCanary, Agile/Scrum

PROJECTS

JazzCash & JazzCash Business

Native Android · Kotlin · Hilt · Coroutines/Flow

Veem global payments, C2C bulk transfers and Yeylo BNPL inside a national wallet used by millions.

Family Locator

Native Android & Kotlin Multiplatform · Google Maps · WebSockets · Ktor

Real-time family location sharing and live tracking, with shared KMP logic across Android and iOS and a low-latency Ktor backend.

AI Sticker Generator

Native Android & Kotlin Multiplatform · Compose Multiplatform · Generative AI

Turns text prompts and photos into custom stickers, ready to share on WhatsApp and other messaging apps.

AI Photo Editor

Native Android · Jetpack Compose · Generative AI

One-tap AI enhancement, background removal and style filters, with a smooth Compose editing canvas.

Urdu Voice Keyboard

Native Android · Custom IME · Speech-to-text

Native Urdu and stylish-font keyboards with real-time voice typing.
