PROFESSIONAL SUMMARY

Results-driven **Android Engineer** with **5+ years of experience** architecting, developing, and scaling high-performance Android applications and FinTech platforms. Deep technical expertise in **Kotlin, Java, Jetpack Compose, Coroutines/Flow, Dagger-Hilt, Koin, and RESTful APIs**. Proven track record engineering secure payment integrations (Veem, C2C Bulk Payments, BNPL) and low-latency real-time systems. Strong grasp of **Material Design 3**, accessibility standards, and clean architecture to deliver intuitive, responsive user experiences while driving agile delivery and high code quality.

TECHNICAL SKILLS

Languages:	Kotlin (Advanced), Java (Proficient), SQL, JSON
Android & UI/UX:	Jetpack Compose, Material Design 3 , Android UI/UX Best Practices, Accessibility Services, XML Layouts, Custom Views, Navigation Component
Architecture:	MVVM, Clean Architecture , MVI, SOLID Principles, Multi-Module Architecture, Repository Pattern, Kotlin Multiplatform (KMP/CMP)
Background & Concurrency:	WorkManager, Foreground & Background Services, Kotlin Coroutines, StateFlow / SharedFlow , LiveData, Android Lifecycle
Dependency Injection:	Dagger-Hilt, Koin
Networking & Backend:	Backend API Development using Ktor, Retrofit, OkHttp, RESTful APIs, WebSockets , Ktor Client
Data Persistence:	Room Database , SQLite, DataStore / SharedPreferences
Cloud, DevOps & Tools:	Firebase (FCM, Crashlytics, Analytics, Remote Config), Git , GitHub, Android Profiler, LeakCanary, Agile/Scrum, CI/CD

PROFESSIONAL EXPERIENCE

Senior Android Engineer — **AKSA-SDS (JazzCash)**

06/2025 – 08/2026

Islamabad, Pakistan • FinTech & Digital Banking Platforms

- Spearhead the architecture and feature development of national-scale mobile FinTech applications (**JazzCash & JazzCash Business**) serving millions of daily active consumer and merchant users.
- Architected and integrated end-to-end payment rails, including **Veem (Global Payment Platform)**, **C2C Bulk Payments**, and **Yeylo (Buy Now Pay Later / BNPL)** with strict transactional integrity, encryption, and zero-failure rate.
- Built interactive financial reporting and transaction dashboards, allowing merchant partners to track real-time revenue trends, settlement histories, and daily sales metrics.
- Enforced **MVVM and Clean Architecture** with **Dagger-Hilt** and **Kotlin Coroutines/Flow**, modularizing codebases to reduce coupling, eliminate memory leaks, and boost overall app responsiveness.
- Engineered scalable **App Localization** infrastructure supporting seamless multi-language switching across nationwide demographics.
- Championed engineering quality: conducted comprehensive code reviews, established testing benchmarks, and collaborated closely with Product Managers and UI/UX Designers to guarantee timely sprint delivery.

Android Developer — Funprime Technology

03/2023 – 03/2025

Islamabad, Pakistan • Mobile Products & AI Innovations

- Designed, built, and shipped 5+ production Android applications from scratch using **Kotlin, Jetpack Compose, Coroutines, and RESTful APIs**.
- Engineered low-latency real-time tracking and social discovery platforms (**Family Locator, Handshake**) leveraging Google Maps API, Location Services, **WebSockets**, and Ktor backends.
- Developed high-utility AI media applications (**AI Photo Editor, AI Voice Translator, AI Sticker Generator**), implementing Android **Accessibility Services** for real-time on-screen text capture and translation.
- Integrated **Firebase Cloud Messaging (FCM), Crashlytics, Remote Config** for high-throughput push messaging, remote A/B testing, and robust analytics tracking.
- Profiled app performance using Android Profiler and LeakCanary to resolve memory leaks, optimize frame rendering to 60 FPS, and maintain a >99.8% crash-free session rate.
- Worked in an Agile/Scrum cross-functional team with product managers, QA, and backend engineers, participating in backlog grooming, sprint planning, and retrospectives.

Android Developer — Solution of Technologies

08/2022 – 03/2023

Rawalpindi, Pakistan • Consumer Applications

- Developed custom native Input Method Editor (IME) applications (**Urdu Keyboard with Voice Typing, Stylish Fonts Keyboard**) with real-time speech-to-text recognition and low input latency.
- Engineered algorithmic prayer timing calculations and offline Quran access, implementing local caching and data persistence with **Room Database and SQLite**.
- Applied **Material Design principles** and accessibility standards to optimize UI responsiveness, boosting Play Store app ratings to 4.6/5 stars across 500K+ downloads.
- Built resilient API consumption layers using **Retrofit and JSON parsing**, featuring robust network error-handling and exponential backoff retry policies.

Junior Android Developer — Techinn Technologies

10/2021 – 08/2022

Rawalpindi, Pakistan

- Engineered native on-device image manipulation algorithms ("Gender Swap") utilizing low-level Android Bitmap and Canvas processing without external third-party API dependencies.
- Collaborated with senior engineers using **Git** for version control, mastering Android component lifecycles, background threading, and clean object-oriented architecture in Java and Kotlin.

EDUCATION

Bachelor of Science in Software Engineering (BS SE)

BUITEMS (Balochistan University of Information Technology, Engineering and Management Sciences) • Quetta, Pakistan

Graduated:

03/2021
